«Голубой цветок»

KUSUDAMA FLOWER

6 pieces of paper cut into squares. The pieces are each 7 x 7 cm.

Fold the bottom corner to the top. This will make a triangle.

Fold the left and right corners up to the middle corner. This makes a square.

Fold the top corners down. The folded edge will line up exactly on top of the outside edge of the square.

Open up the flaps you have just created and flatten them.

Fold the top triangles towards you so they are level with the edges of the paper. (This will result in 3 little petals on the inside of your petal; if you fold the top triangles away from you, this will result in only 1 petal on the inside of the petal.)

Fold the triangles back using the crease you made earlier and glue the outside triangles together.
